Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. Applicant's amendment and arguments of May 25, 2006 is acknowledged and entered.
2. The allowance of claim 5 is withdrawn with apologies. Thus, this action is not made final.
3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 5, 6 and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Carroll, III et al.

Carroll, III et al. shows a fuel supply method for a fuel injection device including a fuel injection unit 10 provided with a plurality of fuel injection members comprising holding the fuel injection unit by a holding unit (the barrel as recited in column 4, line 61) and connecting the fuel injection members to the holding unit by a connecting unit 20 (column 4, lines 58-64), wherein a fuel is supplied to the fuel injection members through fuel supply passages formed in the holding unit and the connecting unit so as to extend

Art Unit: 3752

from the holding unit through the connecting unit via passages 25, 26, and 28 to the fuel injection members, and wherein the fuel injection members comprise a first fuel injection member 32 and an annular second fuel injection member 46 surrounding the first fuel injection member. Since the device shows all of the structural limitations, the device is capable of carrying out the method as recited in claim 1. The fuel injection members further comprise an annular third fuel injection member 34 surrounding the second fuel injection member 46 as recited in claims 9 and 10.

Allowable Subject Matter

6. Claims 4 and 7 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Lambert and Lambert et al. are pertinent to Applicant's invention.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 571-272-4919.
